Installation: What to Expect

USI wants you to fully understand the process of estimating, scheduling and inspecting your insulation and air sealing projects. Our teams will keep you informed during all stages, beginning with a free one-hour consultation and a written estimate. We schedule the work at your convenience, clean up after ourselves, and inspect the work with you to ensure you are 100% satisfied.

BATT INSULATION Common and cost-effective, batt insulation provides basic coverage for attics, walls, crawl spaces, ceilings and basements. It's quick and affordable, and also offers sound dampening qualities.

BLOWN-IN INSULATION With a high percentage of recycled content, blown-in is eco-friendly and very energy efficient. It provides a dense, effective barrier against heat loss in attics, walls and hard-to-reach spaces.

SPRAY FOAM INSULATION Spray foam insulation is the most advanced, energy-efficient insulation and air sealant available today. USI offers a nationwide team dedicated to installing this excellent energy-saving technology.

SOUND ATTENUATION Reducing noise in your home can be achieved through proper selection of insulation and air sealing products for walls, ceilings and attics. Ask USI about noise-reducing insulation options.

AIR SEALING All of the cracks, holes and gaps in your home could form the equivalent of a 30-inch-wide window being open at all times. Thorough insulation begins with sealing these hidden holes with proven air sealing techniques.

RADIANT BARRIER This specialized roof insulation reduces attic temperatures by up to 30 degrees in the summer. In warmer climates, it reflects and reduces the radiant energy of the sun by 97 percent.

For more about these products, please see the Insulation section at USIinc.com.

Sources for energy usage and spray foam insulation facts include energy.gov and knaufinsulation.us. For more information and money-saving ideas, please see Rebates & Energy Efficiency at USIinc.com.

Insulating your home is one of the most cost-effective ways to control utility bills and enhance its comfort and value. By reducing energy loss, insulation also reduces your impact on the environment. Through careful selection and experienced, professional installation, USI can help you make the most of your investment.

As heating and cooling costs rise, so does the interest in making homes more energy efficient. USI is here to help. We specialize in air sealing services and insulation installation in order to optimize the comfort and integrity of your home.

Facts About Energy Loss & Energy Savings

- Up to 60% of a home's heat can be lost through the attic.
- Many homes have gaps and cracks that are the equivalent of a 30-inch window being open at all times.
- Heating and cooling is the largest energy expense for most homes. According to Energy.gov it accounts for nearly half of home energy usage.

Facts About Insulation & Air Sealing Services

- Insulation and air sealing services can save up to 48% on your utility bills.
- Air sealing services may account for up to 10% savings on your utility bills.
- Batt insulation provides good R-Values as well as sound dampening.
 - Up to 80% recycled content is available.
- Blown-in insulation provides better R-Values and better noise control.
 - Up to 85% recycled content is available, making this an excellent choice for the environment.
- Spray foam insulation provides the best R-Values while also air sealing tiny cracks and gaps.

Areas of coverage for insulation and air sealing include:

- | | | |
|-------------------|-----------------------|-------------------------|
| • <i>Attics</i> | • <i>Crawl Spaces</i> | • <i>Walls</i> |
| • <i>Ceilings</i> | • <i>Floors</i> | • <i>Roof Interiors</i> |
| • <i>Windows</i> | • <i>Doors</i> | |

The USI Difference represents trust, experience, knowledge and performance, from planning through construction. Excellence in every step of the process ensures timely completion and quality service, time after time.

Making energy-efficient home improvements is a great idea.

New and improved insulation products meet today's high standards for building quality. We encourage homeowners to learn more about these products and the tax credits, rebates and other incentives available from the government and local utility companies.

Insulation Recommendations by Geographic Area

Learn the recommended insulation levels for improving your home with additional insulation. Visit USIinc.com for a guide to rebates and energy efficiency.

» How Do I Know If I Need More Insulation?

If your family feels hot or cold in select areas of your home, you may need a professional to inspect your home's insulation levels. In addition, if you don't know how much insulation exists in your home's attic and walls, your next step is to call a qualified insulation contractor.

A USI insulation expert will come to your home to identify how much insulation you have and how much you need to add for optimal insulation levels. Our professional assessments and estimates are free.

Please visit USIinc.com for more information about insulation recommendations, energy savings and rebates that help offset the cost of adding insulation.

Let our professional team help you with selection and installation of the best possible insulation and air sealing products for your home. Start with a free estimate today by calling us or requesting an estimate on USIinc.com.
